PeopleSoft Enterprise Release Notes for SCM Inventory Management 8.9 Bundle 7

These release notes reflect application updates for PeopleSoft Enterprise Inventory Management (IM) products since the SCM 8.9 Bundle 6. This document includes resolutions for the following PeopleSoft Enterprise Inventory Management applications:

- PeopleSoft Enterprise Inventory.
- PeopleSoft Enterprise Managing Costs.

PeopleSoft Enterprise Inventory

This table summarizes application updates for PeopleSoft Enterprise Inventory since the SCM 8.9 Bundle 6.

Functional Categories	Description
Fulfill Stock Orders	<ul style="list-style-type: none"> • Corrected delete statement to prevent error from occurring when removing picking quantity from counter sales / picking feedback. • Changed to properly set required fields when a line is canceled. • Modified key field on temporary tables to avoid a duplicate insert when the route selection program processes multiple schedules for the same item. • Modified code to allow newly created backorders to have the zero picked flag set to 'N'. • Modified the Order Release process and Pick Plan (ins6000.sqr) to correctly print notes and in a specified language. • Changed the Order Release and the Picking Confirmation Pages to prevent an error when the user preference setid is not set. • Modified code to avoid an error on the Shortage Workbench when the release kit multiples flag is turned off. • Changed the 'foreign' and 'foreign and domestic' type of Bill of Lading documents to no longer require the order number on the search page.
Manage Inventory	Modified to display the correct value of the in-transit quantity on Item Balance by All Units page.
Performance	Resolved performance issue on the InterUnit Transfer Search page.
Replenish Inventory	Changed to create replenishment requests for items that have an Interunit adjustment made for a cancelled transfer/close Interunit receipt prior to receiving the material.
Vendor Managed Inventory	<ul style="list-style-type: none"> • Modified the Auto numbering for sales orders and MSRs to check the operator preferences when processing a vendor managed inventory (VMI)

	<p>order.</p> <ul style="list-style-type: none">• Modified the vendor managed inventory (VMI) Replenishment process to pass the default customer PO to the new order.
--	---

PeopleSoft Enterprise Managing Costs

This table summarizes application updates for PeopleSoft Enterprise Managing Costs since the SCM 8.9 Bundle 6.

Functional Categories	Description
Cost Accounting	<ul style="list-style-type: none">• Modified to enable the update of matched cost data on consigned actual costed items.• Modified to enable the costing of the receipt side of bin-to-bin transactions for perpetual average costed items when insufficient quantity exists.• Modified to override logic to work with transactions related to consigned items• Modified to cost value adjustments of actual costed items when there are multiple cost elements.
Create Accounting Entries	<ul style="list-style-type: none">• Modified to allow receipt line cancellations to post to the accounting line.• Changed prompt table on the Accounting Rules page to allow non-inventory items.
Review Transaction Entries	Changed the Accounting Entries page to enable returning to the Project Costing Transactions page if drilling down from projects.
Upgrade	Modified to enable the costing of payables adjustments on pre-upgrade receipts created in Release 7.5 for actual costed items.
